... that are reflected in nature is best ~~explained~~ through example. understood

In fact — we have the perfect of only ~~one~~ example: life on Earth.

Life on the Earth, also known as 'The Tree of Life' among biologists (note: Ruan, you need to explain or mention the ToL & phylogeny earlier in the talk before this), falls broadly into three "Domains" (the rarely discussed rank above "Kingdom"): Eukaryotes & the Prokaryote domains Archaea & Bacteria.

~~\* Anova for heterozygosity~~

~~→ Kruskal Wallis?~~

Bacteria Archaea Eukaryota ] (Domain)
